

Xinru LU

Tel: (+1) 341213350

Email: xinru_lu@berkeley.edu

San Francisco Bay Area, CA

Education

Aug 2026 - Dec 2027	
University of California, Berkeley	
Master of Design (MDes)	Focus: Interaction Design, UX Design, Emerging Technologies
Sep 2022 - Jun 2026	
China Academy of Art	
B.A. in Product Design	Focus: Product Design, Intelligent Interaction

Professional Experience

Jun 2025 - Jun 2026	
Fotile Group	UX/UI Design Intern
- Designing IoT-based spatial solutions focusing on safety, accessibility, and emotional companionship for the aging population. - Integrating smart sensing technologies into furniture to create a dignified and high-quality living environment.	
Sep 2025 - Oct 2025	
Free Coffee	Product Design Consultant
Participating the CMF and exterior design for a smart coffee machine scheduled for 2026 launch.	
Mar 2025 - May 2025	
Aliyun (Alibaba Cloud)	AI Creator & Interaction Designer
- Co-developed "Food Time," an open-source AI generative art project showcased at the D20 Summit. - Trained customized LoRA models to generate style-specific assets; collaborated with developers to optimize the generation workflow. - Contributed to the open-source community by sharing model weights and prompt engineering strategies.	
Nov 2024 - Jan 2025	
MYbank (Ant Group) – AIGC Loan Livestreaming Project	Design Lead, Intern
- Participated in the visual and interaction optimization for loan service live-streaming rooms, utilizing AIGC tools to enhance production efficiency. - Conducted user profiling and analyzed survey data to identify key conversion drivers; designed 5 distinct live-room themes targeting specific demographics. - Created AIGC-driven assets (green screen backgrounds, handheld props, conversion cards), resulting in a significantly improved user engagement metrics and "Excellent Project" recognition.	
Jun 2023 - Sep 2023	
Ningbo Ruika Electric Co., Ltd.	Product Design Assistant
- Spearheaded the ergonomic redesign of hair dryers for the North American market based on hand-size anthropometric data. - Collaborated with R&D and Sales teams to balance aesthetic form with technical constraints. Outcome: The redesigned product achieved a 30% month-over-month sales increase within 3 months of launching on Amazon US.	

Attended Projects & Research

Aug 2025	
"Unbounded" – Multimodal Interactive Installation	Designer & Technical Lead
- Designed an emotion-sensing robot exploring the "conspiracy and contingency" between humans and machines. - Technical Implementation: Utilized Blender for 3D modeling and printing; fabricated silicone shells for tactile realism. Engineered the interaction system using Arduino and employed the Deepface large model for real-time facial emotion recognition. - Managed the exhibition setup, coordinating material logistics and on-site construction with a 20-person team.	

May 2025	
Flat Foot Correction Smart Wearable	Summer School Researcher
• Conducted medical research on flat-foot pathology; designed and prototyped a corrective shoe integrating support mechanics and user comfort.	
Apr 2023	
Intangible Cultural Heritage Research	Ethnographic Researcher
• Conducted field research in Yixian, Anhui on Hui Ink craftsmanship; produced a comprehensive research paper and documentary analyzing the modernization of traditional crafts.	

Awards & Honors

Jun 2025	HKDADC Hong Kong Digital Art Design Competition
2030 Rain Vehicle (Product Design) -- Gold Award	
Oil Safety Storage (System Design) -- Third Award	
Aug 2025	11th "Academy Award" National Art & Design Competition
European Design (Form Design) -- Third Prize	
Jun 2025	4th Future Aces (FA) Competition China
Sonic Canvas (Interaction Design) -- Silver Award	
2030 Rain Vehicle (Product Design) -- Gold Award	
Yuhang Revolving Lantern (Digital Media Design) -- Finalist Award	
Apr 2025	2025 Global Visual Design Awards
European Design (Form Design) -- Bronze Award	

Additional

Language Skills: Chinese(Native), English(Fluent)

Software Skills: Figma, Rhino, Keyshot, Arduino, TouchDesigner, Python, Blender, Photoshop, Illustrator, InDesign, Procreate
