EDUCATION

University of California, Berkeley | Master of Design (MDes)
Aug 2026 - Expected graduation: December 2027 | Interaction Design, UX & Emerging Technologies

China Academy of Art | B.A. in Product Design
Sep 2022 - Jun 2026 | Product Design & Intelligent Interaction

SELECTED DESIGN PROJECTS

AIGER Kitchen | Individual Project - UX & Interaction Design | 2025 - 2026
- Translated a survey finding - 13 of 22 respondents remembered the hood only after switching on the stove - into an ignition-linked ventilation concept, removing the separate hood-on step from the proposed flow.
- Built an interactive browser simulation that shows linked appliance states and preserves manual hood control. Conducted 20 interviews and 10 simulated usability sessions in the original project; the current UI iteration has not been retested.

Little Atlas | Individual Project - Berkeley Coursework | 2026
- Designed and built a deployed travel-memory web prototype with AI-assisted coding, an illustrated globe, a timeline, postcards and Gemini-powered trip planning.
- Reworked the data model to let one place hold multiple visits and linked map and timeline views to the same memories. Kept AI-generated travel plans separate from saved personal stories.

PROFESSIONAL EXPERIENCE

Fotile Group | UX/UI Design Intern | Jun 2025 - Jun 2026
- Designed connected-home concepts for older adults, integrating kitchen layouts, appliance-control interfaces and safety-support scenarios.
- Designed a kitchen island in Rhino and produced CAD drawings used by a manufacturer for fabrication; confirmed dimensions, selected materials, revised drawings and inspected the finished island.

Free Coffee | Product Design Consultant | Sep 2025 - Oct 2025
- Contributed CMF and exterior design for a smart coffee machine, aligning material and form with the product concept.

Alibaba Cloud | AI Creator & Interaction Designer | Mar 2025 - May 2025
- Trained custom LoRA models, modeled and rendered scenes, illustrated characters, and created animations for Food Time, an immersive Hemudu food-culture concept.

MYbank (Ant Group) | Design Lead, Intern | Nov 2024 - Jan 2025
- Analyzed user profiles and survey data to shape five audience-specific livestream themes for financial services; designed visual assets and interaction elements for loan-service communication.

Ningbo Ruika Electric | Product Design Assistant | Jun 2023 - Sep 2023
- Used hand-size anthropometric data to redesign hair-dryer ergonomics for North American users; collaborated with R&D and sales on comfort and technical constraints.

SKILLS

Design: UX design, product design, AI product design, interaction & UI design, user flows, user interviews, surveys, simulated usability testing, physical prototyping, ergonomics, CMF.

Tools: Figma, Adobe Creative Cloud, Rhino, KeyShot, Blender, Arduino, TouchDesigner, Python; AI-assisted web prototyping and custom LoRA training.

Languages: Mandarin Chinese (native), English (fluent).
